When it comes to your employees you want to offer them the best service and options that are available to them. We have built a strong foundation for service. All of our counselors that work with retirees are Licensed Medical Social Workers or former teachers. We understand that when working with a population of clients over the age of 65, they have a special set of needs and requests. We are prepared to support any of their needs from the moment they become our client.

If a Post-65 retiree solution is what you are looking for that includes HR support, employer assistance, as well as a reduction in current costs; then you have found it!

Don't forget to ask about the *Caregiver Assistance Program*. The only one in the nation that is created for employees that are a part of the sandwich generation.
